Lab1A Questions

1. Mystery.c ran a fork bomb on the computer. A fork bomb is a program with the sole purpose of spawning another version of itself. It does this enough times that eventually, the computer will not function properly.
2. The man command looks up the manual for the given command. It then prints it to the console for the user to look at using a simple interface.
3. Man Page Sections
 - (a) 1. Commands
 - (b) 2. System Calls
 - (c) 3. C Library Calls
 - (d) 4. Special files (Devices)
 - (e) 5. File Formats and Conventions
 - (f) 6. Games
 - (g) 7. Conventions and Miscellaneous
 - (h) 8. System Management Commands
